

EDGEsky

ALUMINIUM ROOF LANTERN
& FLAT GLASS ROOFLIGHT

EDGEsky roof lantern

The slimline EDGEsky roof lantern has all the advantages of a thermally broken aluminium construction. This allows for wide design flexibility and it provides a clean, contemporary, modern finish. Precision engineering, optimisation and modern manufacturing techniques have created a **beautifully proportioned, thermally efficient, strong and secure** lantern solution for your home.

Why choose the EDGEsky roof lantern?

Structural Elegance • Thermal Efficiency • Strong and Secure

The slim elegant EDGEsky roof lantern fits perfectly in any home by retaining traditional features in a contemporary setting.

EDGEsky roof lantern

Aesthetics

Hidden Fixings

Fully concealed fixings ensure sight lines flow gracefully and uninterrupted throughout bringing unrivalled elegance and balance.

The Finishing Touch

Every component used has been developed to work in harmony with the others and enhance the overarching design. EDGEsky is the best possible finish for your extension.

Attention to Detail

Attention to detail is present throughout, from the engineered structure, the bespoke weather seals, the innovative glass locks all the way to the sleek snap-fit endcaps.

Slim Sections

At only 57mm wide, the spars and ridge sections are amongst the slimmest on the market. Coupled with our sculpted bosses they provide a look usually associated with timber construction.

Traditional Meets Modern

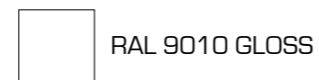

Narrow yet deep structural profiles with subtle ogee detailing along the lower edges provide a clean classic feel

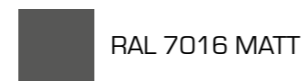

Range of colours

Our standard colours are Gloss White, Matt Grey and Matt Black. These can be chosen in any combination of inner and outer.

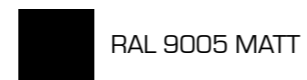

We can also supply your roof in any bespoke colour of your choice from the standard RAL and BS colour ranges.

RAL 9010 GLOSS

RAL 7016 MATT

RAL 9005 MATT

colours are a print representation only

Keeping the heat in and the weather out

Thermal efficiency of our roof has been guaranteed by the elimination of cold bridging, achieved by isolating of the external profiles from the internal ones. Combined with high performance glazing, the EDGEsky's ability to reduce heat transfer is in a class of its own.

Warmth

With complete roof U values from 1.2w/m2K, the EDGESky roof lantern provides your home with a room that's comfortable all year round.

Thermally Broken Eaves Beam

Thermal efficiency starts at the bottom of our roof. Eaves beams are fully thermally broken to create an insulated barrier between the aluminium sections.

Insulating T-bar

Our in-house designed high quality insulating T-bar bridges the gap between the profiles and the aluminium finishing caps to create the largest possible thermal break.

Performance Glazing

EDGESky can be supplied with a range of high performance self-cleaning glass options to suit every taste. To complement your new roof you can choose from either blue, aqua, bronze, tinted, neutral or clear and with U Values ranging from 1.0 – 1.2.

Ambience Glass

	Blue	Aqua	Ultra	Sunshade Blue	Bronze	Neutral
U Value	1.2 W/m2K	1.0 W/m2K	1.0 W/m2K	1.0 W/m2K	1.2 W/m2K	1.2 W/m2K
Solar Heat Reflection	60 %	82 %	91 %	80 %	55 %	60 %
Light Transmission	47 %	30 %	8 %	34 %	38 %	37 %
Self Cleaning	Yes	Yes	No	Yes	Yes	Yes

EDGESky roof lantern

EDGESky has been optimised to create the strongest and stiffest roof lantern possible with minimal structure to obscure your view.

Unparalleled in strength, the EDGESky can survive whatever nature throws at it. Put into perspective a 6m x 4m EDGESky roof lantern can support a load of over 8 tonnes to the ridge

The choice is simple

The best looks to complement your project

- Slim
- Traditional
- Clean Lines
- Attention to Detail
- The Finishing Touch

The most efficient in class

- Complete Roof U values from 1.2
- 100% Thermally Broken
- High Performance Glazing

The strongest on the market

- More Glass, Less Roof
- Highest Quality Weatherproofing
- Security
- Exceeds Standards

Light, comfort and safety maximised

More Glass, Less Roof

Design optimisation ensures that EDGEsky has the largest glass spans and fewest rafters currently available from any other system on the market.

Highest Quality Weatherproofing

Providing the last word in weather protection EDGEsky uses the best seals and gaskets available throughout, ensuring complete peace of mind in the most extreme conditions.

Security

Our innovative glass lock system and tamper proof fasteners keep everything tightly in place and once finishing capping's are fitted, there are no visible fasteners anywhere to be seen.

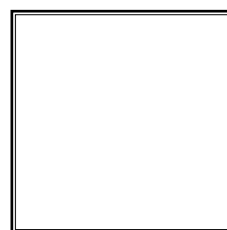

EDGEsky flat glass rooflight

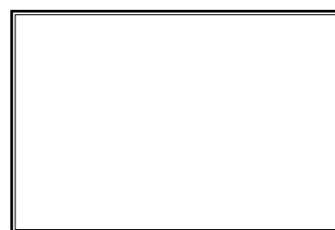

The slimline EDGEsky flat rooflight is the ultimate in simplistic, modern minimalism. It has exceptional thermal performance and is very straightforward to install with minimal internal and external sightlines.

Flat Rooflight stock sizes

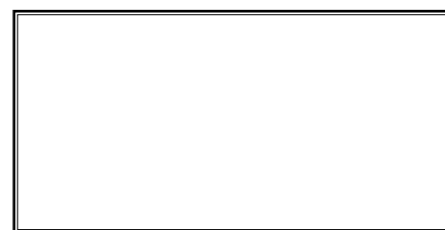

(internal sizes; 85mm kerb thickness)

SLEEK DESIGN

- Edge to edge glass with polished edge
- Overall U Value (double glazing and frame) 1.3 w/m²k
- Glass U Value 1.0 w/m²k
- Shatter proof laminated glass as standard

SIMPLE INSTALLATION

- Hidden strap fixing
- Internal plasterboard pocket for easy boarding and plastering
- Fits to builders kerb (must be 5 degrees pitch)

THE ULTIMATE FLAT ROOFLIGHT

"Amazing product, really impressed. Looks incredibly smart - just the product I needed and just the product I will ever get from now on..."
Housebuilder, Chichester.

*"...Edge building products came to the rescue as usual with their product and superb professional attitude, and a cutting edge simple modern aluminum roof...
...super easy to install and glaze, and the finished product was clean and slim. The whole product as an entirety I can speak highly of..."*
Window installer, Bognor Regis

"We are extremely pleased with the roof light, a lot of effort must have gone into the minimalistic design and 'timber look' finish, which is very pleasing to the eye. Very easy to piece together and fit, altogether a great product !"
Developer, Arundel
